MINUTES OF THE SPECIAL COMMUNITY DEVELOPMENT COMMISSION

July 23, 2018

CALL TO ORDER: The meeting was called to order by Chairman Rowe at 6:00p.m.

ROLL CALL: Upon roll call the following Commissioners were present:

Rowe, Ciula, Wasowicz, King, Czarnecki

Absent: Rodriguez, Marcotte

A quorum was present.

STAFF PRESENT: S. Viger, K. Pozsgay

JOURNAL OF

PROCEEDINGS: The minutes of the Community Development Commission Meeting of

July 3, 2018 were presented.

Motion: Commissioner King made a motion to approve the minutes as presented.

Commissioner Wasowicz seconded the motion.

All were in favor. Motion carried.

PUBLIC

COMMENT: There was no Public Comment.

Review Zoning Ordinance Module

Three: Jacob Seid, Senior Planner for Chicago Metropolitan Agency for Planning

(CMAP) and his team presented a review of the Zoning Ordinance Module Three to the Commission. General discussion was held.

ADJOURNMENT: There being no further business before the Community Development

Commission, Commissioner King made a motion to adjourn the meeting.

Commissioner Wasowicz seconded the motion.

All were in favor. Motion carried.

The meeting was adjourned at 7:17 p.m.

Ronald Rowe, Chairman Community Development Commission

REQUEST:

Variance, Shed size,

Municipal Code Section 10 - 14 - 12B - 3.

SUMMARY:

- 1. The Petitioner had a stop work order for building a new shed with attached deck without a permit. He was replacing an old tired shed.
- 2. The new shed is larger than allowed by Code. The shed is 257 square feet and the attached deck with roof is 128 square feet. The maximum allowed shed size by code is 160 square feet.
- 3. The shed is located in an easement.
- 4. The shed is not built to code.
- 5. Two similar shed variances were approved in 2017.

RECOMMENDATION:

Staff recommends the Approval of the above Findings of Fact and therefore the Approval of the Variance for Kamil Matyja with the following conditions:

- 1. Complete building plans shall be provided.
- 2. Shed must meet all current building code standards.
- 3. Shed must be moved outside of the easement.
- 4. Shed must not impede any exiting drainage or cause any drainage issues to neighboring sites.

Village of Bensenville

LEGAL NOTICE/PUBLIC NOTICE NOTICE OF PUBLIC HEARING

NOTICE IS HEREBY GIVEN that on Tuesday, August 7, 2018 at 6:30 P.M., the Community Development Commission of the Village of Bensenville, Du Page and Cook Counties, will hold a Public Hearing to review Case No. 2018 – 17 to consider a request for:

Variance, Shed size, Municipal Code Section 10 - 14 - 12B - 3.

751 South Center Street is in a RS -1 Low Density Single Family district. The Public Hearing will be held in the Village Board Room at Village Hall, 12 S. Center Street, Bensenville, IL.

The Legal Description is as follows:

LOT 16, IN CRESTBROOK, A SUBDIVISION IN THE SOUTHEAST QUARTER OF SECTION 23, TOWNSHIP 40 NORTH, RANGE 11 EAST OF THE THIRD PRINCIPAL MERIDIAN, ACCORDING TO THE PLAT THEREOF RECORDED JULY 22, 1955 AS DOCUMENT 766038, IN DUPAGE COUNTY, ILLINOIS.

Commonly known as 751 South Center Street, Bensenville, Illinois.

Kamil Matyja of 751 South Center Street, Bensenville, IL 60106 is the owner and applicant for the subject property.

Any individual with a disability requiring a reasonable accommodation in order to participate in any public meeting held under the authority of the Village of Bensenville should contact the Village Clerk, Village of Bensenville, 12 S. Center St., Bensenville, IL 60106, (630) 766-8200, at least three (3) days in advance of the meeting.

Applicant's application and supporting documentation may be examined by any interested parties in the office of the Community and Economic Development Department, Monday through Friday, in the Village Hall, 12 South Center Street, Bensenville, IL 60106. All interested parties may attend and will be heard at the Public Hearing. Written comments will be accepted by the Community and Economic Development Department through August 7, 2018 until 5:00 P.M.

ZONING: RS – 1 Low Density Single Family district

REQUEST: Variance, Shed size,

Municipal Code Section 10 - 14 - 12B - 3.

PUBLIC NOTICE:

1. A Legal Notice was published in the Bensenville Independent on Thursday July 19, 2018. A Certified copy of the Legal Notice is maintained in the CDC file and is available for viewing and inspection at the Community & Economic Development Department during regular business hours.

2. Village personnel posted a Notice of Public Hearing sign on the property, visible from the public way on Friday July 20, 2018.

3. On Friday July 20, 2018, Village personnel mailed from the Bensenville Post Office via First Class Mail a Notice of Public Hearing to taxpayers of record within 250' of the property in question. An Affidavit of Mailing executed by C & ED personnel and the list of recipients are maintained in the CDC file and are available for viewing and inspection at the Community & Economic Development department during regular business hours.

SUMMARY:

The Petitioner had a stop work order for building a new shed with attached deck without a permit. He was replacing an old tired shed. The new shed is larger than allowed by code. The shed is 257 square feet and the attached deck with roof is 128 square feet. The maximum allowed shed size by code is 160 square feet.

SURROUNDING LAND USES:

	Zoning	Land Use	Comprehensive Plan	Jurisdiction
Site	RS – 1	Residential	Single Family Residential	Village of Bensenville
North	RS – 1	Residential	Single Family Residential	Village of Bensenville
South	RS – 1	Residential	Single Family Residential	Village of Bensenville
West	RS-1	Residential	Single Family Residential	Village of Bensenville
East	RS – 1	Residential	Single Family Residential	Village of Bensenville

DEPARTMENT COMMENTS: SUPPORTS THE FOLLOWING APPLICABLE VILLAGE GOALS: Financially Sound Village **Quality Customer Oriented Services** Safe and Beautiful Village X | Enrich the lives of Residents Major Business/Corporate Center **Vibrant Major Corridors** Finance: Account up to date. Police: No police issues. **Engineering and Public Works:** Public Works: No comments. Engineering: 1) It should be located outside of the PUE. 2) It should impede any exiting drainage. 3) It should not cause any drainage issues to neighboring sites. Community & Economic Development: **Economic Development:** No comments. Fire Safety: No fire safety issues.

Building:

- 1) The shed is not only too large, it has been constructed in the easement.
- 2) It has to be moved out of the easement.
- 3) It also appears that the materials used for the shed floor framing, sheathing for the shed floor and the deck floor framing is not of decay resistant material (i.e. treated material) as required by code.
- 4) The non-permitted shed will have to be disassembled to correct all issues.
- 5) Permit application was received 6/26, after the stop work order.
- 6) Plan review comments sent 7/3. Complete plans have not yet been provided as requested in review comments.

Planning:

- 1) The 2015 Comprehensive Plan indicates "Single Family Residential" for this property.
- 2) There was a prior shed on the property.
- 3) The shed is 257 square feet. The maximum allowed shed size by code is 160 square feet.
- 4) The attached deck with roof is 128 square feet.

- 5) Without full building plans, the mean height of the roof is hard to discern. The peak height is 14.4 feet. Maximum allowed mean height is 12 feet. We do not have a variation request for height.
- 6) There is concern that applicant doesn't meet the hardship approval criteria.
- 7) Village approved two shed size variances in 2017:
 - a. 333 Diana Court. Approved a 364 square foot shed in a RS 2 Medium Low Density Single Family District. Max size allowed is 120 square feet.
 - b. 1009 S Church Rd. Approved a 240 square foot shed in a RS 4 Medium High Density Single Family district. Max allowed is 160 square feet.

APPROVAL CRITERIA FOR VARIANCES:

The Community Development Commission shall not recommend nor shall the Village Board grant a variance unless it shall make findings based upon the evidence presented to it in each specific case that:

1. Special Circumstances: Special circumstances exist that are peculiar to the property for which the variances are sought and that do not apply generally to other properties in the same zoning district. Also, these circumstances are not of so general or recurrent a nature as to make it reasonable and practical to provide a general amendment to this Title to cover them.

Response: Plans to build a new shed started when my old shed completely gave out. I applied for a variance because it is approximately 100 sq. ft. bigger as determined by the village. I'm hoping to get the permits approved so that I can beautify my little piece of Bensenville.

2. Hardship or Practical Difficulties: For reasons set forth in the findings, the literal application of the provisions of this Title would result in unnecessary and undue hardship or practical difficulties for the applicant as distinguished from mere inconvenience.

Response: If I would have to reconfigure the size of my shed, it will be at great cost to my family and me. Also I would like to get it done as soon as possible because all my yard and gardening tools are covered by a tarp on my yard.

3. Circumstances Relate to Property: The special circumstances and hardship relate only to the physical character of the land or buildings, such as dimensions, topography or soil conditions. They do not concern any business or activity of present or prospective owner or occupant carries on, or seeks to carry on, therein, nor to the personal, business or financial circumstances of any party with interest in the property.

Response: The main reason I'm applying for the variance is because the shed exceeds approximately 100 sq. ft. more then allowed by village ordinance.

4. Not Resulting from Applicant Action: The special circumstances and practical difficulties or hardship that are the basis for the variance have not resulted from any act, undertaken subsequent to the adoption of this Title or any applicable amendment thereto, of the applicant or of any other party with a present interest in the property. Knowingly authorizing or proceeding with construction, or development requiring any variance, permit, certificate, or approval hereunder prior to its approval shall be considered such an act.

Response: There has not been any action taken, on our part, to proceed with construction. We now know that a Variance is needed in order to proceed with obtaining the permit, for construction to resume.

5. Preserve Rights Conferred by District: A variance is necessary for the applicant to enjoy a substantial property right possessed by other properties in the same zoning district and does not confer a special privilege ordinarily denied to such other properties.

Response: Alot of the sheds in my neighborhood that are newer have been built to exceed the village ordinance and I would like to enjoy the same right to improve and enhance my property while living in Bensenville.

6. Necessary for Use of Property: The grant of a variance is necessary not because it will increase the applicant's economic return, although it may have this effect, but because without a variance the applicant will be deprived of reasonable use or enjoyment of, or reasonable economic return from, the property.

Response: Without the variance, I will not be able to enjoy the additional space I need to make my yardwork, gardening and honestly my life a little bit easier. In other words I would have to make costly and time consuming changes to the shed.

7. Not Alter Local Character: The granting of the variance will not alter the essential character of the locality nor substantially impair environmental quality, property values or public safety or welfare in the vicinity.

Response: The shed, will not in any way impair the environmental quality or welfare of the vicinity in which I live in and it will have little to no effect on the property value because an old shed was on the property when I bought it.

8. Consistent with Title and Plan: The granting of a variance will be in harmony with the general purpose and intent of this Title and of the general development plan and other applicable adopted plans of the Village, as viewed in light of any changed conditions since their adoption, and will not serve in effect to substantially invalidate or nullify any part thereof.

Response: If this Variance is granted, it will, in no way, interfere with the General Development Plan adopted by the Village of Bensenville.

9. Minimum Variance Needed: The variance approved is the minimum required to provide the applicant with relief from undue hardship or practical difficulties and with reasonable use and enjoyment of the property.

Response: If the Variance is approved, we will be able to proceed with our plans to obtain a permit and resume construction without incurring additional costs.

	Meets (Criteria
Variances Approval Criteria	Yes	No
1. Special Circumstances	X	
2. Hardship	X	
3. Circumstances relate to the Property	X

5. Preserve Rights Conferred By District	X	
6. Necessary for the Use of the Property	X	
7. Not Alter Local Character	X	
8. Consistent with Title and Plan	X	
9. Minimum Variance Needed	X	

RECOMMENDATIONS:

Staff recommends the Approval of the above Findings of Fact and therefore the Approval of the Variance for Kamil Matyja with the following conditions:

- 1. Complete building plans shall be provided.
- 2. Shed must meet all current building code standards.
- 3. Shed must be moved outside of the easement.
- 4. Shed must not impede any exiting drainage or cause any drainage issues to neighboring sites.

Respectfully Submitted, Department of Community & Economic Development

REQUEST:

Amendment to Conditional Use Permit, Ordinance No. 53A – 2012.

SUMMARY:

- 1. The Petitioner is seeking an Amendment to Conditional Use Permit, to add an additional two truck fueling stations.
- 2. They also propose to make enhancements to the truck exit by further attempting to restrict left turns onto Foster Avenue, which have been a problem even with the current configuration constructed to limit the movement.
- 3. A neighborhood meeting was held on May 16. Meeting notes are included with this report. In summary: a. Neighbors are firmly against the proposal as is.
 - b. If the applicant is to expand, they should explore moving north, away from the homes, and not south, closer to the homes.
- 4. The Petitioner revised their plans based on the community meeting, eliminating the stacking variance request, adding the new fueling stations to the north of the existing stations, and eliminating two parking spaces.

RECOMMENDATION:

Staff recommends the Approval of the above Findings of Fact and therefore the Approval of the Conditional Use Permit Amendment for Thorntons with the following conditions:

- 1. The property be developed in substantial compliance with the plans submitted Kimley-Horn, Inc. dated 03.01.18 and revised 06.21.18;
- 2. New fueling lanes to be developed on north side of property as proposed in revised plans, away from homes to the south;
- 3. Applicant works with homes to the south to address light from signage;
- 4. Applicant fixes fence along Foster Avenue;
- Applicant works with engineering on final changes to site plan regarding truck movements onto Foster Avenue.

An Affidavit of Mailing executed by C & ED personnel and the list of recipients are maintained in the CDC file and are available for viewing and inspection at the Community & Economic Development department during regular business hours.

SUMMARY:

The Petitioner is seeking to amend a previously approved Conditional Use Permit to allow a Gasoline and Diesel Fuel Service Station. The Petitioner wants to add two (2) additional Diesel Fuel service lanes. They also propose to make enhancements to the truck exit by further attempting to restrict left turns onto Foster Avenue, which have been a problem even with the current configuration constructed to limit the movement.

SURROUNDING LAND USES:

	Zoning	Land Use	Comprehensive Plan	Jurisdiction
Site	C – 2	Fueling Station	Regional Commercial	Village of Bensenville
North	O – 2	Office	Commercial/Industrial Flex	Village of Bensenville
South	C – 2	Fueling Station	Regional Commercial	Village of Bensenville
West	C-2	Fueling Station	Regional Commercial	Village of Bensenville
East	I-2	Industrial	Industrial	Village of Bensenville

DEPARTMENT COMMENTS: SUPPORTS THE FOLLOWING APPLICABLE VILLAGE GOALS: Financially Sound Village **Quality Customer Oriented Services** Safe and Beautiful Village Enrich the lives of Residents X | Major Business/Corporate Center **Vibrant Major Corridors** Finance: No past due balances. Police: 1) The additional pumps may attract more trucks. Without knowing, the police department has no opinion on whether the proposal will reduce or increase the traffic problems associated with the location. 2) The proposed structural change to the Foster exit to reduce the number of left turn violators onto Foster Avenue is supported. Engineering and Public Works: 1) The adjustment to the exit lane curb is very subtle. Concern that it will do anything to discourage left turns out onto Foster. It might need a sharper point at the east side to reinforce that it's a right-only. 2) Do not support the use of any type of bollard or delineator on Foster Avenue. **Community & Economic Development: Economic Development:** 1) Generally supportive of the amendment to the Conditional Use Permit. 2) The additional truck fueling stations will allow increased vehicle circulation through the property, increasing the number of transactions and resulting in additional sales tax revenue for the Village. Fire Safety: No issues. Building: No comments.

Planning:

- 1) The 2015 Comprehensive Plan indicates "Local Commercial" for this property.
- 2) In the 2013 CEDS this property falls in the "Northern Business District".
- 3) The amendment to the CUP is based on the addition of two fueling stations and a modified site plan.
- 4) No modifications are proposed for the existing building, just the truck canopy.
- 5) Conditions from previous approvals that were not met include:

- a. 19. A cross access agreement be established with the property to the north (for a non-competing use).
 - i. Note: Thorntons had discussed a cross access agreement with their landlord but the costs were unfeasible.
- b. 20. The Applicant shall work with the Village on the installation of a sign denoting the Bensenville Northern Business District on the property.
- 6) Staff had concerns about the truck stacking variance request in the previous proposal. Applicant amended the proposal based on the neighborhood meeting and staff comments. New proposal elements some parking to accommodate new fueling stations to the north.
- 7) Staff has concerns that trucks may park in "non parking" spaces anyway, causing truck movement issues on site.
- 8) While the staff understands the argument that the two new fueling stations will help the applicant serve more customers during peak hours, there is a real concern of induced demand. The concern is that more trucks will be served, causing even more backups onto Foster Ave.
- 9) A neighborhood meeting was held on May 16. Meeting notes are included with this report. In summary:
 - a. Neighbors are firmly against the proposal first proposed.
 - b. If the applicant is to expand, they should explore moving north, away from the homes, and not south, closer to the homes.

*NOTE: Thorntons revised their plans, addressing concerns about more truck fueling stations closer to the residents.

APPROVAL CRITERIA FOR CONDITIONAL USES:

The Community Development Commission shall not recommend approval of the Conditional Use Permit without determining that the request meets the following approval criteria and making certain findings of fact. The Applicant has provided the following Findings of Fact:

1. Traffic: The proposed use will not create any adverse impact of types or volumes of traffic flow not otherwise typical of permitted uses in the zoning district has been minimized.

Applicant's Response: The project is proposing to restrict exiting left turns from the store to increase safety on Foster Avenue.

2. Environmental Nuisance: The proposed use will not have negative effects of noise, glare, odor, dust, waste disposal, blockage of light or air or other adverse environmental effects of a type or degree not characteristic of the historic use of the property or permitted uses in the district.

Applicant's Response: There will not be any adverse environmental effects.

3. Neighborhood Character: The proposed use will fit harmoniously with the existing character of existing permitted uses in its environs. Any adverse effects on environmental quality, property values or neighborhood character beyond those normally associated with permitted uses in the district have been minimized.

Applicant's Response: The character of the neighborhood will not be altered.

4. Use of Public Services and Facilities: The proposed use will not require existing community facilities or services to a degree disproportionate to that normally expected of permitted uses in the district, nor generate disproportionate demand for new services or facilities in such a way as to place undue burdens upon existing development in the area.

Applicant's Response: The expansion will not affect the use of public services and facilities.

5. Public Necessity: The proposed use at the particular location requested is necessary to provide a service or a facility, which is in the interest of public convenience, and will contribute to the general welfare of the neighborhood or community.

Applicant's Response: The expansion of two diesel fuel canopies will allow Thorntons to better serve the existing corridor.

6. Other Factors: The use is in harmony with any other elements of compatibility pertinent in the judgment of the commission to the conditional use in its proposed location.

Applicant's Response: No response.

1. Traffic	X	
2. Environmental Nuisance	X	
3. Neighborhood Character	X	
4. Public Services and Facilities	X	
5. Public Necessity	X	
6. Other Factors	X	

APPROVAL CRITERIA FOR VARIANCES:

The Community Development Commission shall not recommend nor shall the Village Board grant a variance unless it shall make findings based upon the evidence presented to it in each specific case that:

1. **Special Circumstances:** Special circumstances exist that are peculiar to the property for which the variances are sought and that do not apply generally to other properties in the same zoning district. Also, these circumstances are not of so general or recurrent a nature as to make it reasonable and practical to provide a general amendment to this Title to cover them.

Response: Space does not exist on the site to provide additional stacking for the proposed fuel positions. The proposed fuel positions will allow Thorntons to serve customers more efficiently and allow for more customers to be served in less time which will help to alleviate stacking.

2. Hardship or Practical Difficulties: For reasons set forth in the findings, the literal application of the provisions of this Title would result in unnecessary and undue hardship or practical difficulties for the applicant as distinguished from mere inconvenience.

Response: Adhering to the stacking requirements would result in a hardship for Thorntons. Thorntons would not be able to provide the additional dispensers at the store.

3. Circumstances Relate to Property: The special circumstances and hardship relate only to the physical character of the land or buildings, such as dimensions, topography or soil conditions. They do not concern any business or activity of present or prospective owner or occupant carries on, or seeks to carry on, therein, nor to the personal, business or financial circumstances of any party with interest in the property.

Response: The stacking area between the entrance to the fuel dispenser area and the fuel canopy does not have adequate space to allow for the additional stacking requirements.

4. Not Resulting from Applicant Action: The special circumstances and practical difficulties or hardship that are the basis for the variance have not resulted from any act, undertaken subsequent to the adoption of this Title or any applicable amendment thereto, of the applicant or of any other party with a present interest in the property. Knowingly authorizing or proceeding with construction, or development requiring any variance, permit, certificate, or approval hereunder prior to its approval shall be considered such an act.

Response: The special circumstances have not been created by the applicant and are existing site conditions.

5. Preserve Rights Conferred by District: A variance is necessary for the applicant to enjoy a substantial property right possessed by other properties in the same zoning district and does not confer a special privilege ordinarily denied to such other properties.

Response: Given the unique site constraints, granting of the variance does not provide special privilege to the development.

6. Necessary for Use of Property: The grant of a variance is necessary not because it will increase the applicant's economic return, although it may have this effect, but because without a variance the applicant will be deprived of reasonable use or enjoyment of, or reasonable economic return from, the property.

Response: The granting of the variance is necessary for Thorntons to be able to provide additional fueling lanes to serve customers more efficiently.

7. Not Alter Local Character: The granting of the variance will not alter the essential character of the locality nor substantially impair environmental quality, property values or public safety or welfare in the vicinity.

Response: The granting of the Variance will not alter the essential character of the area.

8. Consistent with Title and Plan: The granting of a variance will be in harmony with the general purpose and intent of this Title and of the general development plan and other applicable adopted plans of the Village, as viewed in light of any changed conditions since

their adoption, and will not serve in effect to substantially invalidate or nullify any part thereof.

Response: The granting of the Variance will be consistent with the existing conditional use. The variance will provide Thorntons the ability to serve their customers more effectively.

9. Minimum Variance Needed: The variance approved is the minimum required to provide the applicant with relief from undue hardship or practical difficulties and with reasonable use and enjoyment of the property.

Response: The variance requested is the minimum variation needed. Thorntons would not be able to provide the additional dispensers at the store.

	Meets Criteria		
Variances Approval Criteria	Yes	No	
1. Special Circumstances	X		
2. Hardship	X		
3. Circumstances relate to the Property	X		
4. Not Resulting from Applicant Actions	X		
5. Preserve Rights Conferred By District	X		
6. Necessary for the Use of the Property	X		
7. Not Alter Local Character	X		
8. Consistent with Title and Plan	X		
9. Minimum Variance Needed	X		

RECOMMENDATIONS:

Staff recommends the Approval of the above Findings of Fact and therefore the Approval of the Conditional Use Permit Amendment for Thorntons with the following conditions:

- 1) The property be developed in substantial compliance with the plans submitted Kimley-Horn, Inc. dated 03.01.18 and revised 06.21.18;
- 2) New fueling lanes to be developed on north side of property as proposed in revised plans, away from homes to the south;
- 3) Applicant works with homes to the south to address light from signage;
- 4) Applicant fixes fence along Foster Avenue;
- 5) Applicant works with engineering on final changes to site plan regarding truck movements onto Foster Avenue.

Respectfully Submitted, Department of Community & Economic Development

- CONTRACTOR SHALL BE RESPONSIBLE FOR REMOVAL OF THE EXISTING
- 2. CONTRACTOR IS TO REMOVE AND DISPOSE OF ALL DEBRIS, RUBBISH AND OTHER MATERIALS RESULTING FROM PREVIOUS AND CURRENT DEMOLITION OPERATIONS. DISPOSAL WILL BE IN ACCORDANCE WITH ALL LOCAL, STATE AND/OR FEDERAL REGULATIONS GOVERNING SUCH OPERATIONS.
- THE GENERAL CONTRACTOR SHALL TAKE ALL PRECAUTIONS NECESSARY TO AVOID PROPERTY DAMAGE TO ADJACENT PROPERTIES DURING THE CONSTRUCTION PHASES OF THIS PROJECT. THE CONTRACTOR WILL BE HELD SOLELY RESPONSIBLE FOR ANY DAMAGES TO THE ADJACENT PROPERTIES OCCURRING DURING THE CONSTRUCTION PHASES OF THIS PROJECT. CONTRACTOR SHALL NOT DEMOLISH ANYTHING OUTSIDE THE OWNERS
- 4. THE CONTRACTOR IS SPECIFICALLY CAUTIONED THAT THE LOCATION AND/OR ELEVATION OF EXISTING UTILITIES AS SHOWN ON THESE PLANS IS BASED ON RECORDS OF THE VARIOUS UTILITY COMPANIES, AND WHERE POSSIBLE, MEASUREMENTS TAKEN IN THE FIELD. THE INFORMATION IS NOT TO BE RELIED UPON AS BEING EXACT OR COMPLETE. THE CONTRACTOR MUST CALL THE APPROPRIATE UTILITY COMPANY AT LEAST 72 HOURS BEFORE ANY EXCAVATION
- 5. IF DEMOLITION OR CONSTRUCTION ON SITE WILL INTERFERE WITH THE ADJACENT PROPERTY OWNER'S TRAFFIC FLOW, THE CONTRACTOR SHALL COORDINATE WITH ADJACENT PROPERTY OWNER. TO MINIMIZE THE IMPACT ON TRAFFIC FLOW. TEMPORARY RE-ROUTING OF TRAFFIC IS TO BE ACCOMPLISHED BY USING IDOT APPROVED TRAFFIC BARRICADES, BARRELS, AND/OR CONES. TEMPORARY SIGNAGE AND FLAGMEN MAY BE ALSO NECESSARY.
- CONTRACTOR TO VERIFY ALL DEMOLITION QUANTITIES.
- REFER TO GEOTECHNICAL REPORT PROVIDED BY OTHERS FOR ALL SUBSURFACE
- 9. EROSION CONTROL MUST BE ESTABLISHED PRIOR TO ANY WORK ON SITE INCLUDING DEMOLITION.
- 10. THE EXTENT OF SITE DEMOLITION WORK IS AS SHOWN ON THE CONTRACT DOCUMENTS AND AS SPECIFIED HEREIN.
- 12. EXISTING UTILITIES, WHICH DO NOT SERVICE STRUCTURES BEING DEMOLISHED, ARE TO BE KEPT IN SERVICE AND PROTECTED AGAINST DAMAGE DURING DEMOLITION OPERATIONS. CONTRACTOR SHALL ARRANGE FOR SHUT-OFF OF UTILITIES SERVING STRUCTURES TO BE DEMOLISHED. CONTRACTOR IS RESPONSIBLE FOR TURNING OFF, DISCONNECTING, AND SEALING INDICATED UTILITIES BEFORE STARTING DEMOLITION OPERATIONS. EXISTING UTILITIES TO BE ABANDONED ARE TO BE CAPPED AT BOTH ENDS AND FILLED WITH FA-1 OR APPROVED EQUAL. ALL UNDERGROUND UTILITIES TO BE REMOVED ARE TO BE BACKFILLED WITH ENGINEERED FILL OR SELECT EXCAVATED MATERIAL, AS APPROVED BY THE GEOTECHNICAL ENGINEER, TO 95% OF MODIFIED PROCTOR DENSITY WITHIN PAVED AREAS AND TO 90% OF MODIFIED PROCTOR DENSITY FOR GREEN SPACE AREAS, IN ACCORDANCE WITH THE EARTHWORK SPECIFICATIONS. ALL PRIVATE UTILITIES (ELECTRIC, CABLE, TELEPHONE, FIBER

- 14. USE WATER SPRINKLING, TEMPORARY ENCLOSURES, AND OTHER SUITABLE METHODS TO LIMIT DUST AND DIRT RISING AND SCATTERING IN THE AIR TO THE LOWEST LEVEL. COMPLY WITH ALL GOVERNING REGULATIONS PERTAINING TO ENVIRONMENTAL PROTECTION. SEE EROSION CONTROL SHEETS FOR FURTHER EROSION CONTROL REQUIREMENTS.
- 15. COMPLETELY FILL BELOW-GRADE AREAS AND VOIDS RESULTING FROM DEMOLITION OF STRUCTURES TO THE FINAL LINES AND GRADES SHOWN ON THE CONTRACT DOCUMENTS. BACKFILL MATERIAL SHALL BE IDOT APPROVED CRUSHED LIMESTONE (CA-6) OR APPROVED EQUAL. USE SATISFACTORY SOIL MATERIALS CONSISTING OF STONE, GRAVEL AND SAND, FREE FROM DEBRIS, TRASH, FROZEN MATERIALS, ROOTS AND OTHER ORGANIC MATTER. PRIOR TO PLACEMENT OF FILL MATERIALS, ENSURE THAT AREAS TO BE FILLED ARE FREE OF STANDING WATER, FROST, FROZEN MATERIAL, TRASH AND DEBRIS. PLACE FILL MATERIALS IN HORIZONTAL LAYERS NOT EXCEEDING 9" IN LOOSE DEPTH. COMPACT EACH LAYER AT OPTIMUM MOISTURE CONTENT OF FILL MATERIAL TO 95% OF MODIFIED PROCTOR DENSITY UNLESS SUBSEQUENT EXCAVATION FOR NEW WORK IS REQUIRED.
- 16. TANK HOLE SHORING WILL BE REQUIRED DUE TO THE PROXIMITY OF PAVEMENT EXCAVATION FOR FUEL LINE PIPING.

EXECUTIVE SUMMARY

Kimley-Horn and Associates, Inc., (Kimley-Horn) was retained by Thorntons, Inc., to perform a traffic impact study for a proposed expansion to Thorntons Store 314, located on the northeast quadrant of IL 83 (Busse Road) and Foster Avenue in Bensenville, Illinois. The expansion would add two diesel fueling positions to the existing diesel fueling station. Access to the diesel fueling area would be provided by two existing driveways, including an inbound-only driveway (Access A) and an outbound-only driveway (Access B). The diesel fueling area would continue to be separated from the retail gas station and convenience market by a raised curb; internal connectivity between the two uses is not proposed.

As part of this traffic impact study, existing and future traffic conditions were evaluated for the signalized intersection of IL 83/Foster Avenue. Traffic conditions were also evaluated for the existing site access driveways serving the diesel fueling station. The analysis of future conditions considers overall background growth and the addition of site-generated traffic.

Based on a review of future traffic conditions, site-generated traffic is not expected to materially impact the study intersections. The intersection of IL 83/Foster Avenue would operate with delay and 95th percentile queues similar to existing conditions. The site access driveways would operate with acceptable delay and 95th percentile queues for inbound and outbound traffic are projected to be approximately one vehicle or less.

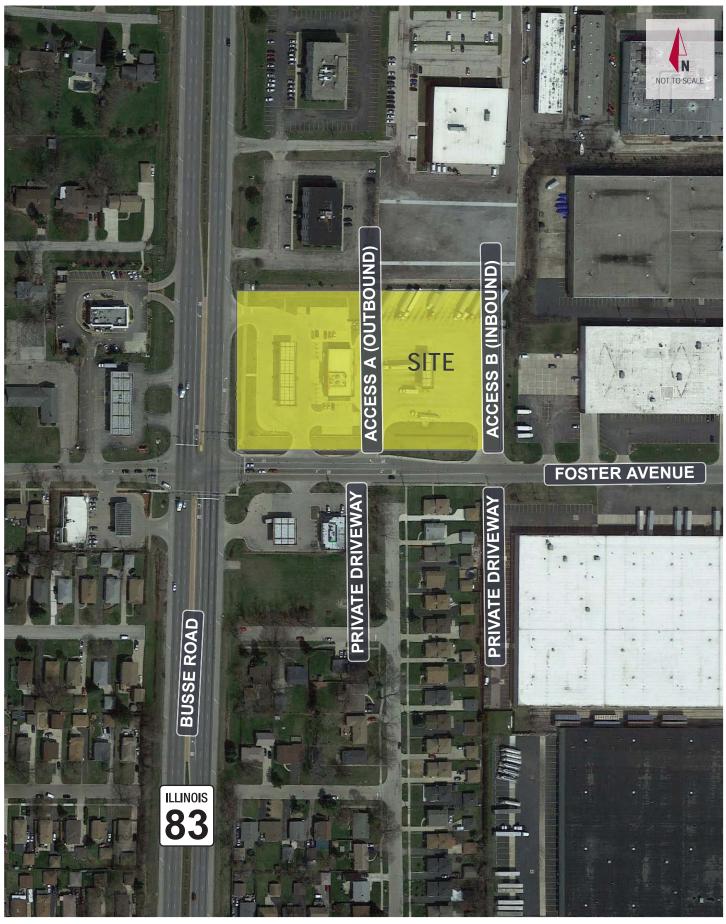

Minor-leg stop control is recommended for outbound traffic at Access B. Additional details related to the improvements identified above are provided in the *Recommendations & Conclusions* section of this report.

1. INTRODUCTION

Kimley-Horn and Associates, Inc., (Kimley-Horn) was retained by Thorntons, Inc., to perform a traffic impact study for a proposed expansion to the existing Thorntons Store 314, located on the northeast quadrant of IL 83 (Busse Road) and Foster Avenue in Bensenville, Illinois. The proposed expansion would add two diesel fueling positions to the existing diesel fueling area; no changes to the retail gas station are proposed. Access to the diesel fueling area would continue to be provided by two existing driveways to Foster Avenue, including an inbound-only driveway (Access A) and an outbound-only driveway (Access B). An aerial view of the study location and the surrounding roadway network is presented in **Exhibit 1**.

As a part of this study, the existing network was analyzed to determine the current operations at the study intersections. Site trip generation characteristics were then established for the proposed diesel fueling expansion and added to background traffic volumes in order to assess the site's impact on the area roadway network. This report presents and documents Kimley-Horn's data collection, and summarizes the evaluation of existing and projected future traffic conditions on the surrounding roadways.

2. EXISTING CONDITIONS

Kimley-Horn conducted a field visit to collect relevant information pertaining to existing land uses in the surrounding area, the adjacent street system, current traffic volumes and operating conditions, lane configurations and traffic controls at nearby intersections, and other key roadway characteristics. This section of the report details information on these existing conditions.

2.1. Area Land Uses & Connectivity

Located on the northeast quadrant of IL 83/Foster Avenue, the subject site is currently occupied by Thorntons Store 314, which includes a convenience market, retail fueling positions, and diesel fueling area. Retail gas stations are located on the northwest, southwest, and southeast quadrants of IL 83/Foster Avenue. Industrial uses are located to the north and east of the subject property. Single-family residences are generally located to the south and west. The site is in close proximity to O'Hare International Airport, located approximately two miles to the east. Access to IL 390 is provided at Thorndale Avenue, located less than one mile north of the subject property. Access to both Interstate 290 and Interstate 90 is provided less than three miles west and north of the site, respectively.

2.2. Existing Roadway Characteristics

Based on a field investigation within the study area, the following information was obtained about the existing roadway network.

IL 83 (Busse Road) is a north-south roadway that runs along the western boundary of the subject property. The Illinois Department of Transportation (IDOT) classifies IL 83 as a Principal Arterial roadway. IL 83 is also designated a Strategic Regional Arterial (SRA) by IDOT. The SRA system was established by IDOT to promote mobility on key routes throughout the Chicago area by applying various strategies, such as access control and limited signalization. Through the study area, IL 83 provides three travel lanes in each direction. At its signalized intersection with Foster Avenue, IL 83 provides a dedicated left-turn lane, two through lanes, and a shared through/right-turn lane on each leg. A speed limit of 45 miles per hour (MPH) is posted within the study area. IL 83 is under IDOT jurisdiction.

Foster Avenue is an east-west roadway that runs along the southern boundary of the site. This roadway is classified by IDOT as a Major Collector east of IL 83 and as a Minor Collector west of IL 83. At its signalized intersection with IL 83, Foster Avenue provides a dedicated left-turn lane, a shared through/right-turn lane on the west leg. On the east leg, Foster Avenue provides a dedicated left-turn lane, one through lane, and a dedicated right-turn lane. A speed limit of 25 MPH is posted within the study area. Foster Avenue is under the jurisdiction of the Village of Bensenville.

Thorntons Diesel Inbound Driveway (Access A) provides access to the diesel fueling station via Foster Avenue. The driveway provides two inbound lanes for truck traffic. A speed limit of 25 MPH is assumed for the purposes of this study.

Thorntons Diesel Outbound Driveway (Access B) provides access to Foster Avenue from the diesel fueling station. The driveway provides a single right-turn only lane for outbound truck traffic. A speed limit of 25 MPH is assumed for the purposes of this study. Minor-leg stop-control is also assumed for this study.

Private Driveways are located opposite both Access A and Access B. The west driveway, located opposite Access B, provides access to a gas station with convenience market. The east driveway, located opposite Access A, provides access to an industrial warehouse development. Each driveway provides a single outbound lane and one receiving lane. For purposes of this analysis, a speed limit of 25 MPH is assumed for each private driveway. Minor-leg stop-control is also assumed for this study.

2.3. Data Collection

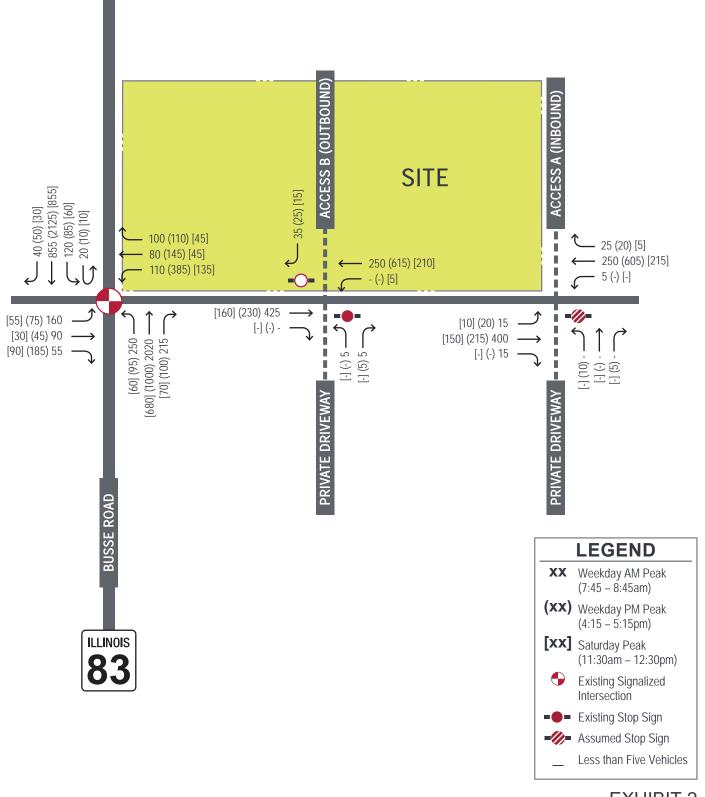

To provide a basis for the trip generation study, turning movement count data was collected at the following intersections within the study area:

- IL 83 (Busse Road) / Foster Avenue
- Foster Avenue / Access A (Inbound)
- Foster Avenue / Access B (Outbound)

The counts were performed during the weekday morning and evening peak periods (7:00-9:00AM and 4:00-6:00PM, respectively). Additional turning movement counts were performed during the Saturday midday peak period (11:00AM-1:00PM). This data indicates that peak traffic volumes occur within the study area from 7:45-8:45AM and 4:15-5:15PM during the weekday, and from 11:30AM-12:30PM on Saturday. Existing peak hour vehicle traffic volumes are presented in **Exhibit 2**.

As shown, IL 83 is heavily traveled, especially during weekday morning and evening peaks. A commuter pattern to the industrial area north of the study area can be denoted, with a higher volume of traffic traveling northbound on IL 83 in the morning, and conversely, a higher volume of traffic in the southbound direction in the evening. At Access B, less than five (5) outbound left-turn vehicles were observed during the weekday peak hours. Access B is an outbound right-turn-only driveway; therefore, for purposes of this analysis, the left-turn vehicles were added to the outbound right-turn movement.

2.4. Existing Capacity Analyses

Synchro software was used to evaluate existing capacity at the study intersections during the weekday and Saturday peak hours. The capacity of an intersection quantifies its ability to accommodate traffic volumes and is expressed in terms of level of service (LOS), measured in average delay per vehicle. LOS grades range from A to F, with LOS A as the highest (best traffic flow and least delay), LOS E as saturated or at-capacity conditions, and LOS F as the lowest (oversaturated conditions). The lowest LOS grade typically accepted by jurisdictional transportation agencies in Northeastern Illinois is LOS D.

The LOS grades shown below, which are provided in the Transportation Research Board's <u>Highway Capacity Manual</u> (HCM), quantify and categorize the driver's discomfort, frustration, fuel consumption, and travel times experienced as a result of intersection control and the resulting traffic queuing. A detailed description of each LOS rating can be found in **Table 2.1**.

Table 2.1. Level of Service Grading Descriptions¹

Level of Service	Description
A	Minimal control delay; traffic operates at primarily free-flow conditions; unimpeded movement within traffic stream.
В	Minor control delay at signalized intersections; traffic operates at a fairly unimpeded level with slightly restricted movement within traffic stream.
С	Moderate control delay; movement within traffic stream more restricted than at LOS B; formation of queues contributes to lower average travel speeds.
D	Considerable control delay that may be substantially increased by small increases in flow; average travel speeds continue to decrease.
Е	High control delay; average travel speed no more than 33 percent of free flow speed.
F	Extremely high control delay; extensive queuing and high volumes create exceedingly restricted traffic flow.

¹ Highway Capacity Manual 2010

The range of control delay for each rating (as detailed in the HCM) is shown in **Table 2.2**. Because signalized intersections are expected to carry a larger volume of vehicles and stopping is required during red time, note that higher delays are tolerated for the corresponding LOS ratings.

Table 2.2. Level of Service Grading Criteria¹

Level of Service	Average Control Delay (s/veh) at:								
Level of Service	Unsignalized Intersections	Signalized Intersections							
А	0 – 10	0 – 10							
В	> 10 – 15	> 10 – 20							
С	> 15 – 25	> 20 – 35							
D	> 25 – 35	> 35 – 55							
E	> 35 – 50	> 55 – 80							
F ²	> 50	> 80							

¹ Highway Capacity Manual 2010

Based on these standards, capacity results were identified for the study intersections under existing conditions. In order to evaluate existing traffic operation, the signal timings for the IL 83/Foster Avenue intersection were obtained from IDOT and verified during field observations. Per IDOT requirements, right-turn on red (RTOR) movements were excluded from the capacity analysis.

The results of capacity analysis for existing conditions are summarized in **Table 2.3**. In this table, operation on each approach is quantified according to the average delay per vehicle and the corresponding level of service. Overall intersection operations are also reported for the signalized intersection of IL 83/Foster Avenue. The results for the unsignalized intersection are based on Synchro's HCM 2010 reports. For the signalized intersection of IL 83/Foster Avenue, the HCM 2010 report is unable to produce capacity results due to the presence of U-turn volumes on the southbound approach. For purposes of this analysis, the capacity results for the intersection of IL 83/Foster Avenue are based on the Synchro Lanes, Volumes, Timings report.

² All movements with a Volume to Capacity (v/C) ratio greater than 1 receive a rating of LOS F.

Table 2.3. Existing (Year 2018) Levels of Service

Minor-Leg Stop-Controlled Intersection

The intersection of IL 83/Foster Avenue is shown to operate at an overall LOS D during the weekday morning peak hour and LOS E during the weekday evening peak hour. During the Saturday midday peak hour, the intersection operates at an overall LOS C. During each peak hour analyzed, the northbound and southbound approaches operate at LOS D or better. During the weekday morning and evening peak hours, the eastbound and westbound approaches operate at LOS E or LOS F. The high delay experienced during the weekday peak hours is largely a function of the relatively long cycle length (150 seconds) and priority given to north-south traffic on IL 83. As a result, long periods of green time are allocated to the north-south through movements and the minor street approaches receive relatively short green times. During the morning peak hour, the 95th percentile queues estimated for the westbound right-turn and southbound left-turn movements exceed the available storage. During the evening peak hour, the 95th percentile queue estimated for the westbound left-turn movement exceeds the available storage. Based on field observations, traffic observed on each leg was generally serviced within a single signal phase.

Existing traffic operation at the access driveways is shown to be acceptable with LOS C or better on all approaches for each peak hour analyzed. At Access A, the estimated 95th percentile queue for the eastbound left-turn movement is approximately one vehicle or less during the peak hours. At Access B, the estimated 95th percentile queue for outbound truck traffic is approximately one vehicle or less during each peak hour.

^{★ -} Signalized Intersection

² Left-turn movement operates at LOS F.

³ Thru movement operates at LOS E.

⁴ Left-turn movement operates at LOS E.

3. FUTURE CONDITIONS

This section of the report outlines the proposed site plan, summarizes site-specific traffic characteristics, and develops future traffic projections for analysis.

3.1. Development Characteristics & Site Access

The proposed expansion would provide two additional diesel fueling positions to the existing diesel fueling area; no changes are proposed for the retail gas station and convenience market. Access to the diesel fueling area would continue to be provided by two existing access driveways to Foster Avenue, including an inbound-only driveway (Access A) and an outbound-only driveway (Access B). The diesel fueling area would continue to be separated from the retail gas station area and convenience market by a raised curb; internal connectivity between the two uses is not proposed. The proposed expansion is depicted in the concept site plan included in the study appendix.

3.2. Trip Generation

Based on the nature of diesel fueling positions, the proposed site expansion was assumed to only generate truck traffic. Because <u>ITE Trip Generation 10th Edition</u> does not provide data specific to diesel fueling stations, Kimley-Horn derived peak hour truck demand based on the traffic counts conducted at Access A and Access B. As shown in Table 3.1 below, the existing diesel fueling station generates a total of 75 trips (40 inbound, 35 outbound) during the morning peak hour and 65 trips (40 inbound, 25 outbound) during the evening peak hour. During the Saturday midday peak hour, a total of 30 trips (15 inbound, 15 outbound) are generated.

Table 3.1. Empirical Peak Hour Trip Generation¹

				Saturday						
Land Use	Unit	A	M Peak Ho	ur	P	M Peak Ho	ur	Midday Peak Hour		
		In	Out	Total	In	Out	Total	In	Out	Total
Existing Diesel Fueling Area	6 fueling positions	40	35	75	40	25	65	15	15	30

¹ Peak hour trips rounded to the nearest multiple of five.

In order to evaluate the trip generation for the two additional diesel fueling positions, an empirical trip generation rate was derived from the existing count data. Per these assumptions, site-generated traffic projections are presented in **Table 3.2**. As shown in the table, two additional diesel fueling positions are expected to generate approximately 25 trips (15 inbound, 10 outbound) during the morning peak hour, 20 trips (10 inbound, 10 outbound) during the evening peak hour, and 10 trips (5 inbound, 5 outbound) during the Saturday midday peak hour. It is assumed for the purpose of this study that site-generated trucks will be new trips at the study intersections.

Table 3.2. Site-Generated Traffic Projections¹

					Saturday						
Land Use	Unit	Doily	ΑN	M Peak Ho	our	PM Peak Hour			Midday Peak Hour		
		Daily	In	Out	Total	ln	Out	Total	ln	Out	Total
Diesel Fueling Area	2 fueling positions	395 ²	15	10	25	10	10	20	5	5	10
Total New Trips		395	15	10	25	10	10	20	5	5	10

¹ Peak hour trips rounded to the nearest multiple of five.

Directional Distribution

The estimated distribution of site-generated traffic on the surrounding roadway network as it approaches and departs the site is a function of several variables, such as the nature of surrounding land uses, prevailing traffic volumes/patterns, characteristics of the street system, and the ease with which motorists can travel over various sections of that system. Based on a review of existing truck volumes at the intersection of IL 83/Foster Avenue, truck traffic is generally evenly distributed northbound and southbound on IL 83. For the purposes of this study, the trip distribution was evenly distributed from the north and south on IL 83. Where the trip generation was five vehicles, truck traffic was assumed to originate north of the site, where industrial warehouses are more prominent and access to the regional transportation network is provided. Based on the assumed trip distribution, the site trip assignment is illustrated in **Exhibit 3**.

² Empirical daily trip generation not available. Daily trips estimated based on ratio of trip generation rates provided for the Daily and peak hours (AM and PM Peak Hours of Adjacent Street Traffic) provided by the Institute of Transportation Engineers (ITE) <u>Trip Generation Manual, 10th Edition</u> for Land Use Code 945, Gasolin/Service Station With Convenience Market.

Kimley» Horn

EXHIBIT 3
SITE TRIP ASSIGNMENT

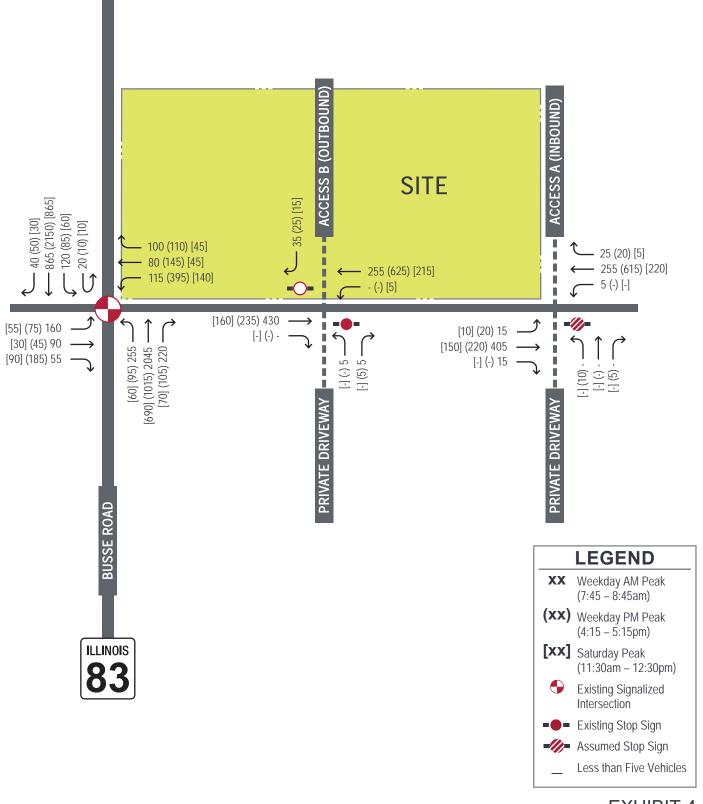

3.3. Future Capacity Analysis

The proposed expansion is expected to be constructed by Year 2018; Kimley-Horn therefore evaluated future traffic conditions for a Year 2023 design horizon (build-plus-five conditions, per typical IDOT requirements). Based on information received from the Chicago Metropolitan Agency for Planning (CMAP), traffic growth on Foster Avenue east of IL 83 is projected at a compounded rate of roughly 0.18 percent annually through Year 2040, while traffic growth west of IL 83 is projected at a compound rate of 0.24 annually. Traffic growth on IL 83 at Foster Avenue is projected at a compound rate of approximately 0.08 annually. For purposes of a conservative analysis, an annual growth rate of 0.24 percent was applied to existing traffic volumes on IL 83 and Foster Avenue; background traffic growth was not applied to access driveways. The projected background traffic volumes are depicted in **Exhibit 4**.

Total traffic projections for Year 2023 were calculated by adding site trips (Exhibit 3) to background traffic projections (Exhibit 4). Traffic projections for the Year 2023 future build scenario are illustrated in **Exhibit 5**.

Based on a review of existing conditions, minor-leg stop control should be posted for outbound traffic at Access B. Based on this assumption, future capacity results for the build condition are provided in **Table 3.3.** Similar to the existing capacity analysis, the results for the unsignalized intersection are based on Synchro's HCM 2010 reports. For the signalized intersection of IL 83/Foster Avenue, the HCM 2010 report is unable to produce capacity results due to the presence of U-turn volumes on the southbound approach. For purposes of this analysis, the capacity results for the intersection of IL 83/Foster Avenue are based on the Synchro Lanes, Volumes, Timings report.

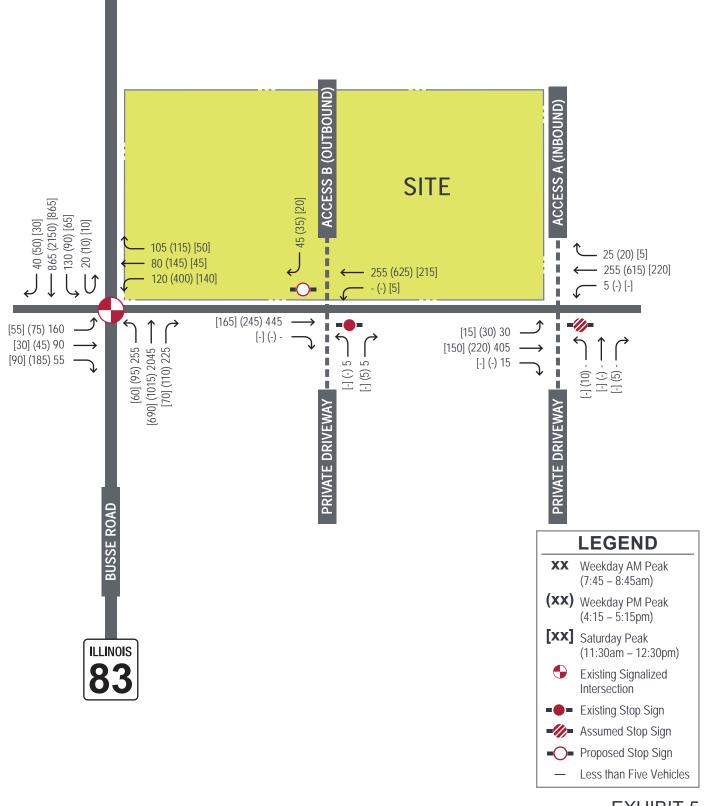

Table 3.3. Future (Year 2023) Levels of Service

 ★ - Signalized Intersection △ - Minor-Leg Stop-Controlled Intersection 								

Signalized Intersection

With the addition of background traffic growth and site-generated traffic, the study intersections are expected to operate with similar delay as compared to existing conditions. Site-generated traffic is not expected to materially impact delay at the study intersections. Furthermore, the projected 95th percentile queues at the intersection of IL 83/Foster Avenue are expected to be similar to existing conditions. At Access A, the 95th percentile queue for the eastbound left-turn movement is projected to be approximately one vehicle or less during the peak hours. At Access B, the 95th percentile queue for outbound traffic is projected to be approximately one vehicle or less during each peak hour analyzed.

¹ Thru movement operates at LOS F. ² Left-turn movement operates at LOS F.

³ Thru movement operates at LOS E.

⁴ Left-turn movement operates at LOS E.

4. RECOMMENDATIONS & CONCLUSIONS

Based on an evaluation of existing and future conditions, the proposed expansion to the existing diesel fueling area is not expected to materially impact traffic operation at the signalized intersection of IL 83/Foster Avenue or the site access driveways. Based on a review of existing and future traffic conditions, minor-leg stop control is recommended for outbound traffic at Access B.

Several additional items should be taken into consideration when preparing the site development plans. While vertical sight distance appears to be adequate within the study area, care should be taken with landscaping, signage, and monumentation at the site access locations to ensure that adequate horizontal sight distance is provided from the new stop bar. If alterations to the site plan or land use should occur, changes to the analysis provided within this traffic impact study may be needed.

DEMOLITION NOTES

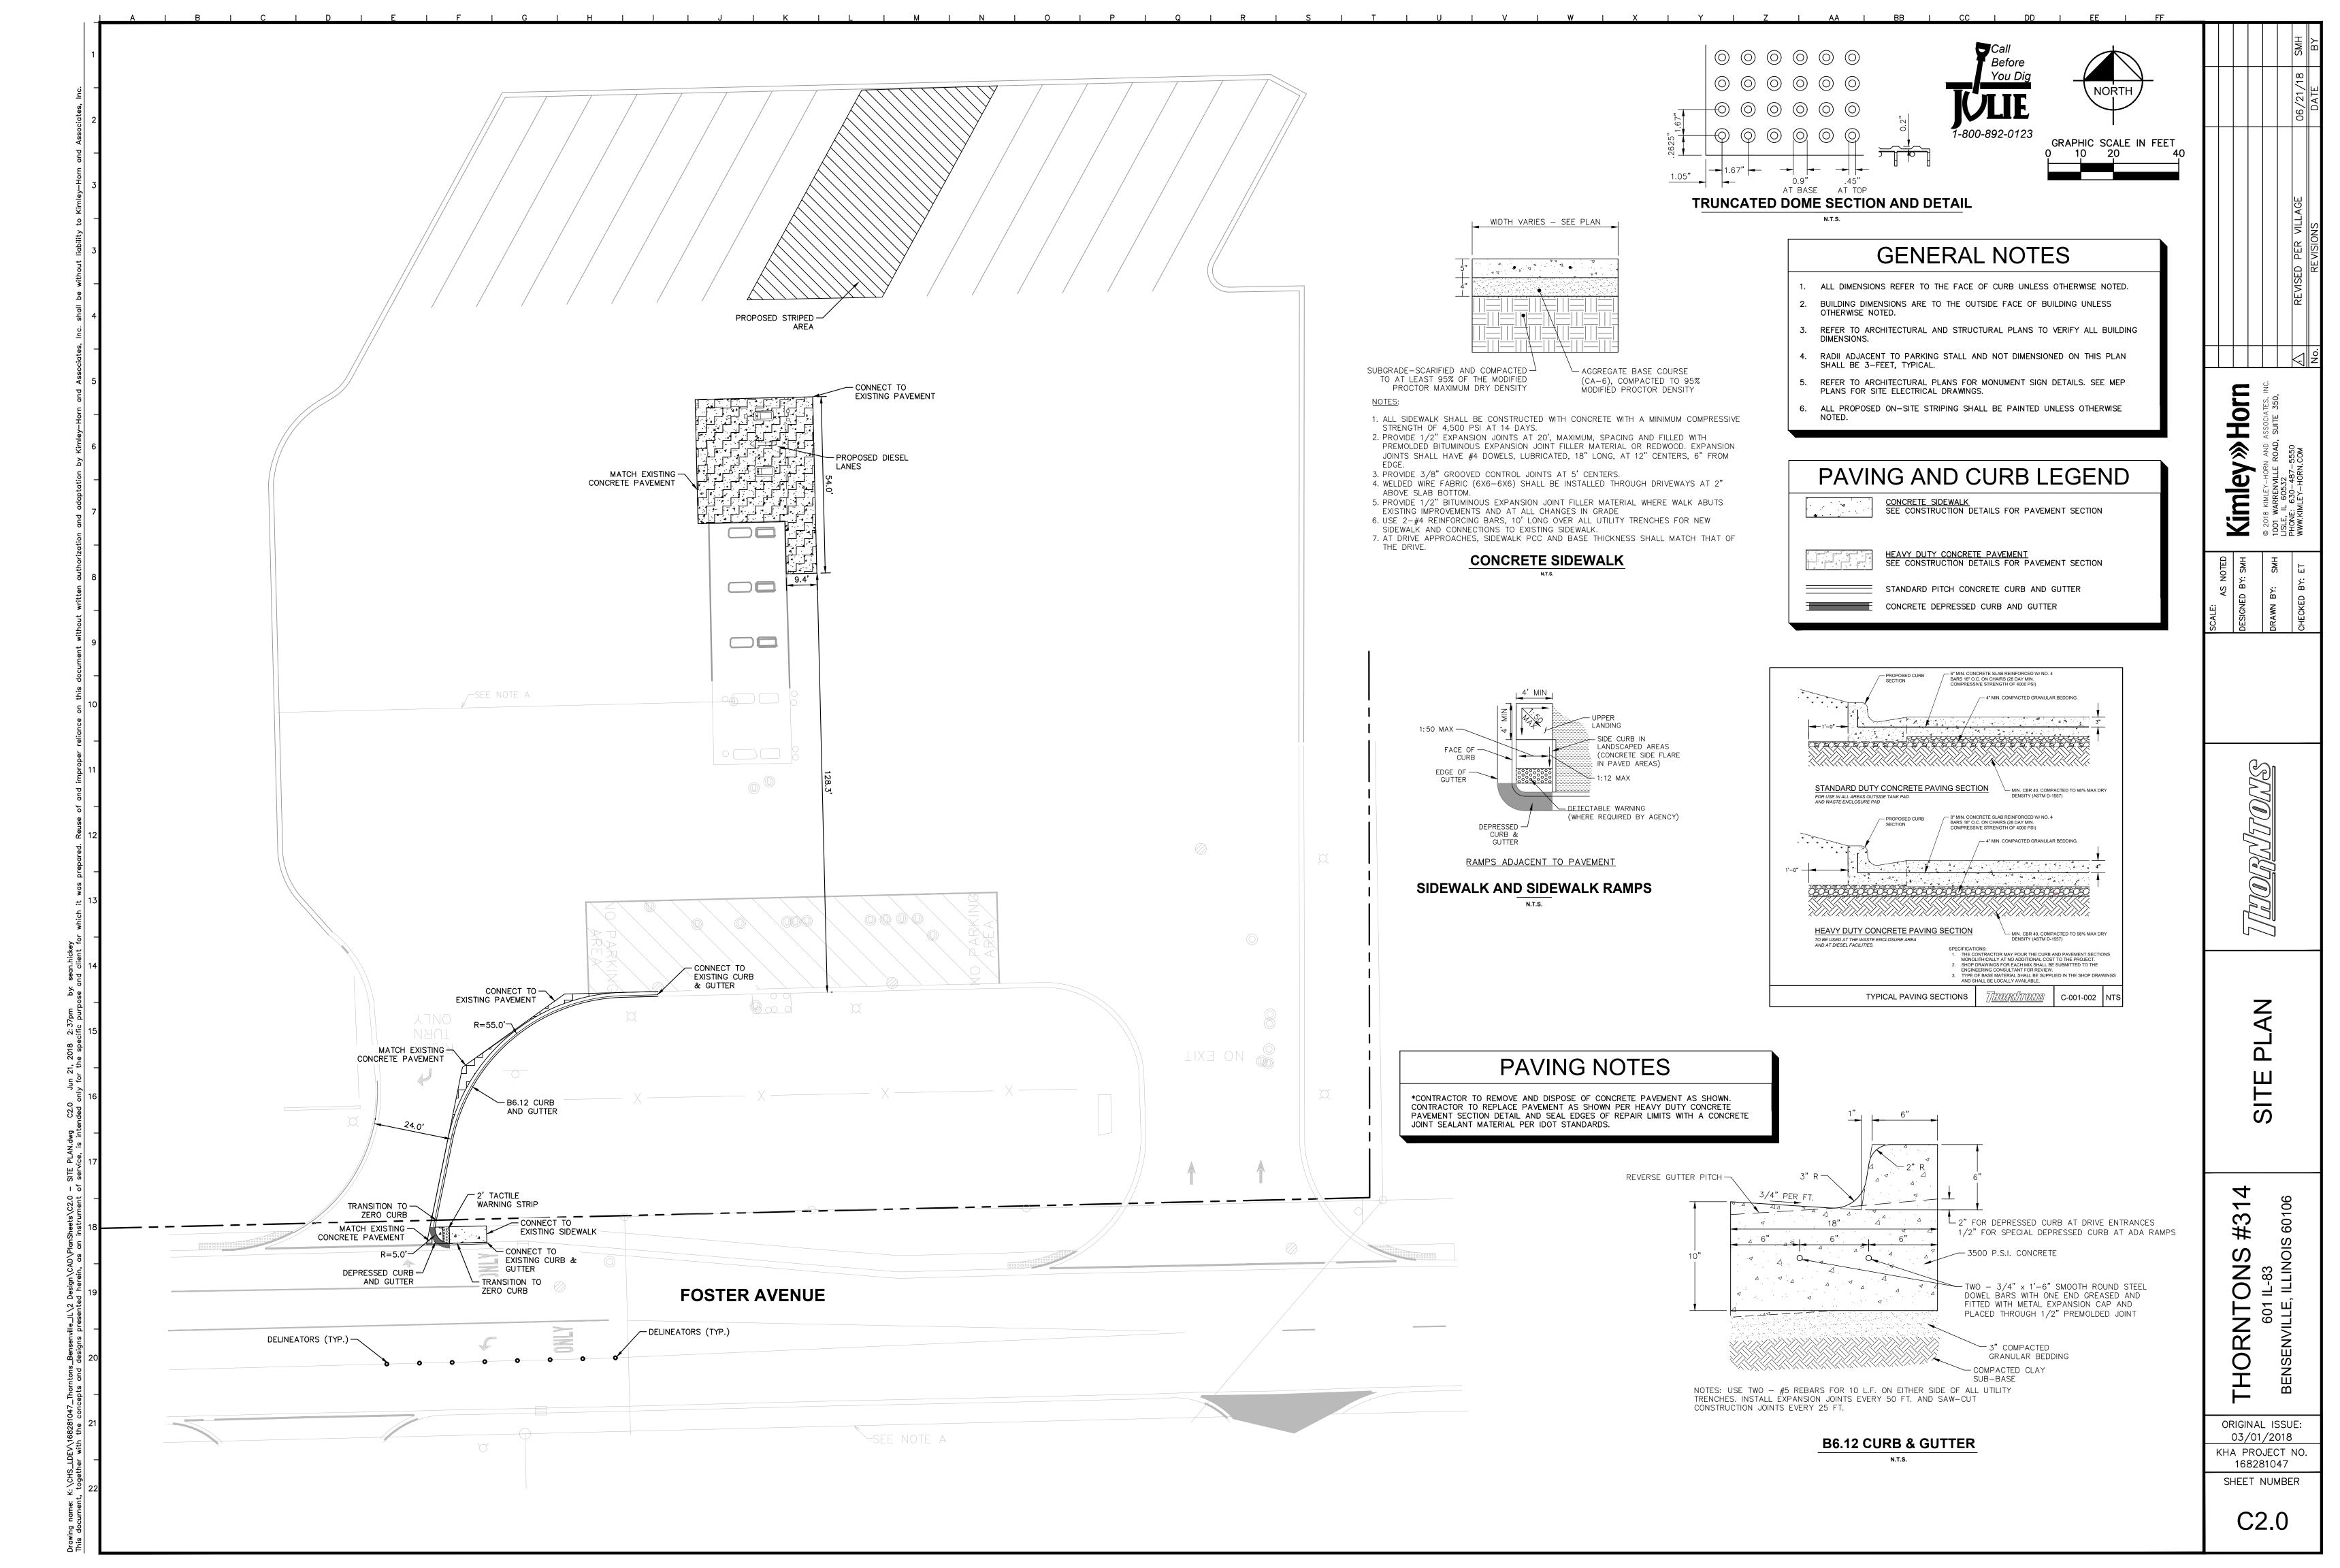

- CONTRACTOR SHALL BE RESPONSIBLE FOR REMOVAL OF THE EXISTING STRUCTURES, RELATED UTILITIES, PAVING, AND ANY OTHER EXISTING IMPROVEMENTS AS NOTED.
- 2. CONTRACTOR IS TO REMOVE AND DISPOSE OF ALL DEBRIS, RUBBISH AND OTHER MATERIALS RESULTING FROM PREVIOUS AND CURRENT DEMOLITION OPERATIONS. DISPOSAL WILL BE IN ACCORDANCE WITH ALL LOCAL, STATE AND/OR FEDERAL REGULATIONS GOVERNING SUCH OPERATIONS.
- 3. THE GENERAL CONTRACTOR SHALL TAKE ALL PRECAUTIONS NECESSARY TO AVOID PROPERTY DAMAGE TO ADJACENT PROPERTIES DURING THE CONSTRUCTION PHASES OF THIS PROJECT. THE CONTRACTOR WILL BE HELD SOLELY RESPONSIBLE FOR ANY DAMAGES TO THE ADJACENT PROPERTIES OCCURRING DURING THE CONSTRUCTION PHASES OF THIS PROJECT. CONTRACTOR SHALL NOT DEMOLISH ANYTHING OUTSIDE THE OWNERS LEASE/PROPERTY LINE UNLESS SPECIFICALLY MENTIONED ON THIS SHEET.
- 4. THE CONTRACTOR IS SPECIFICALLY CAUTIONED THAT THE LOCATION AND/OR ELEVATION OF EXISTING UTILITIES AS SHOWN ON THESE PLANS IS BASED ON RECORDS OF THE VARIOUS UTILITY COMPANIES, AND WHERE POSSIBLE, MEASUREMENTS TAKEN IN THE FIELD. THE INFORMATION IS NOT TO BE RELIED UPON AS BEING EXACT OR COMPLETE. THE CONTRACTOR MUST CALL THE APPROPRIATE UTILITY COMPANY AT LEAST 72 HOURS BEFORE ANY EXCAVATION TO REQUEST EXACT FIELD LOCATION OF UTILITIES.
- 5. IF DEMOLITION OR CONSTRUCTION ON SITE WILL INTERFERE WITH THE ADJACENT PROPERTY OWNER'S TRAFFIC FLOW, THE CONTRACTOR SHALL COORDINATE WITH ADJACENT PROPERTY OWNER, TO MINIMIZE THE IMPACT ON TRAFFIC FLOW. TEMPORARY RE-ROUTING OF TRAFFIC IS TO BE ACCOMPLISHED BY USING IDOT APPROVED TRAFFIC BARRICADES, BARRELS, AND/OR CONES. TEMPORARY SIGNAGE AND FLAGMEN MAY BE ALSO NECESSARY.
- 6 QUANTITIES DEPICTED ON THIS SHEET SHALL SERVE AS A GUIDE ONLY. CONTRACTOR TO VERIFY ALL DEMOLITION QUANTITIES.
- REFER TO GEOTECHNICAL REPORT PROVIDED BY OTHERS FOR ALL SUBSURFACE
- CONTRACTOR SHALL BEGIN CONSTRUCTION OF ANY LIGHT POLE BASES FOR RELOCATED LIGHT FIXTURES AND RELOCATION OF ELECTRICAL SYSTEM AS SOON AS DEMOLITION BEGINS. CONTRACTOR SHALL BE AWARE THAT INTERRUPTION OF POWER TO ANY LIGHT POLES OR SIGNS SHALL NOT EXCEED 24 HOURS.
- 9. EROSION CONTROL MUST BE ESTABLISHED PRIOR TO ANY WORK ON SITE INCLUDING DEMOLITION.
- 10. THE EXTENT OF SITE DEMOLITION WORK IS AS SHOWN ON THE CONTRACT DOCUMENTS AND AS SPECIFIED HEREIN.
- 11. CONTRACTOR MUST RECEIVE APPROVAL FROM CIVIL ENGINEER AND GEOTECHNICAL ENGINEER FOR THE MATERIAL TYPE AND USE IF CONTRACTOR DESIRES TO REUSE DEMOLISHED SITE PAVEMENT AS STRUCTURAL FILL.
- 12. EXISTING UTILITIES, WHICH DO NOT SERVICE STRUCTURES BEING DEMOLISHED, ARE TO BE KEPT IN SERVICE AND PROTECTED AGAINST DAMAGE DURING DEMOLITION OPERATIONS. CONTRACTOR SHALL ARRANGE FOR SHUT-OFF OF UTILITIES SERVING STRUCTURES TO BE DEMOLISHED. CONTRACTOR IS RESPONSIBLE FOR TURNING OFF, DISCONNECTING, AND SEALING INDICATED UTILITIES BEFORE STARTING DEMOLITION OPERATIONS. EXISTING UTILITIES TO BE ABANDONED ARE TO BE CAPPED AT BOTH ENDS AND FILLED WITH FA-1 OR APPROVED EQUAL. ALL UNDERGROUND UTILITIES TO BE REMOVED ARE TO BE BACKFILLED WITH ENGINEERED FILL OR SELECT EXCAVATED MATERIAL, AS APPROVED BY THE GEOTECHNICAL ENGINEER, TO 95% OF MODIFIED PROCTOR DENSITY WITHIN PAVED AREAS AND TO 90% OF MODIFIED PROCTOR DENSITY FOR GREEN SPACE AREAS, IN ACCORDANCE WITH THE EARTHWORK SPECIFICATIONS. ALL PRIVATE UTILITIES (ELECTRIC, CABLE, TELEPHONE, FIBER OPTIC, GAS) SHALL BE REMOVED AND RELOCATED PER THE UTILITY OWNER AND THE LOCAL MUNICIPALITY'S REQUIREMENTS.
- 13. UNDERGROUND UTILITIES SHOWN ARE BASED ON ATLASES AND AVAILABLE INFORMATION PRESENTED AT THE TIME OF SURVEY. CONTRACTOR SHOULD CALL "JULIE" (1-800-892-0123) TO COORDINATE FIELD LOCATIONS OF EXISTING UNDERGROUND UTILITIES BEFORE ORDERING MATERIALS OR COMMENCING CONSTRUCTION. NOTIFY ENGINEER OF ANY DISCREPANCIES IMMEDIATELY. CONTRACTOR SHALL LOCATE AND PROTECT EXISTING UNDERGROUND AND OVERHEAD UTILITIES DURING CONSTRUCTION. UTILITY PROTECTION SHALL BE COORDINATED WITH THE RESPECTIVE UTILITY OWNER AND AS DIRECTED BY THE GOVERNING MUNICIPALITY. DAMAGED CABLES/CONDUITS SHALL BE REPLACED IMMEDIATELY. ALL EXISTING STRUCTURES TO REMAIN SHALL BE PROTECTED THROUGHOUT THE CONSTRUCTION PROCESS. ALL DAMAGED STRUCTURES SHAL BE REPLACED IN-KIND AND THEIR REPLACEMENT COST SHALL BE CONSIDERED INCIDENTAL TO THE CONTRACT. PROPER NOTIFICATION TO THE OWNERS OF THE EXISTING UTILITIES SHALL BE MADE AT LEAST 48 HOURS BEFORE CONSTRUCTION COMMENCES.
- 14. USE WATER SPRINKLING, TEMPORARY ENCLOSURES, AND OTHER SUITABLE METHODS TO LIMIT DUST AND DIRT RISING AND SCATTERING IN THE AIR TO THE LOWEST LEVEL. COMPLY WITH ALL GOVERNING REGULATIONS PERTAINING TO ENVIRONMENTAL PROTECTION. SEE EROSION CONTROL SHEETS FOR FURTHER EROSION CONTROL REQUIREMENTS.
- 15. COMPLETELY FILL BELOW-GRADE AREAS AND VOIDS RESULTING FROM DEMOLITION OF STRUCTURES TO THE FINAL LINES AND GRADES SHOWN ON THE CONTRACT DOCUMENTS. BACKFILL MATERIAL SHALL BE IDOT APPROVED CRUSHED LIMESTONE (CA-6) OR APPROVED EQUAL. USE SATISFACTORY SOIL MATERIALS CONSISTING OF STONE, GRAVEL AND SAND, FREE FROM DEBRIS, TRASH, FROZEN MATERIALS, ROOTS AND OTHER ORGANIC MATTER. PRIOR TO PLACEMENT OF FILL MATERIALS, ENSURE THAT AREAS TO BE FILLED ARE FREE OF STANDING WATER, FROST, FROZEN MATERIAL, TRASH AND DEBRIS. PLACE FILL MATERIALS IN HORIZONTAL LAYERS NOT EXCEEDING 9" IN LOOSE DEPTH. COMPACT EACH LAYER AT OPTIMUM MOISTURE CONTENT OF FILL MATERIAL TO 95% OF MODIFIED PROCTOR DENSITY UNLESS SUBSEQUENT EXCAVATION FOR NEW WORK IS REQUIRED.
- 16. TANK HOLE SHORING WILL BE REQUIRED DUE TO THE PROXIMITY OF PAVEMENT EXCAVATION FOR FUEL LINE PIPING.

EX.

TYPE: DATE: SUBMITTED BY: DEPARTMENT: Public Hearing K. Pozsgay CED 08.07.18 **DESCRIPTION:** Consideration of a Conditional Use Permit (Service Station) for Lincolnwood Gas & Food, Inc, located at 1301 W Irving Park Rd. **SUPPORTS THE FOLLOWING APPLICABLE VILLAGE GOALS:** Enrich the lives of Residents Financially Sound Village Quality Customer Oriented Services Major Business/Corporate Center Safe and Beautiful Village Vibrant Major Corridors **REQUEST:**

Conditional Use Permit, Service Station, Municipal Code Section 10 - 7B - 3.

SUMMARY:

- 1. The Petitioner is applying for a Conditional Use Permit to operate a fueling station at the long vacant property at the northwest corner of Irving Park Road and Spruce Avenue.
- 2. The station will be rebranded as an Exxon with Quick Mart.
- 3. Although not part of the original request, it appears they will need a stacking variance, as they don't meet the required two vehicle stacking positions per fueling pump.
- 4. They were also required to submit building plans, as much of that work had been done with a proper approval. The plans you see are mostly already completed.
- Also of note, the State fire marshal required the property owner to remove existing underground tanks. There are currently no tanks, but the owner says he has new tanks ready to install should the project move forward.
- 6. Staff also has concerns about lack of full traffic study and lack of convincing market analysis/need.

RECOMMENDATION:

Staff recommends the Denial of the above Findings of Fact and therefore the Denial of the Conditional Use for Lincolnwood Gas & Food, Inc. If the CDC recommends approval staff suggests as a minimum the following conditions with the following conditions:

- 1. The Conditional Use Permit be granted solely to the Lincolnwood Gas & Food and shall be transferred only after a review by the Community Development Commission (CDC) and approval of the Village Board. In the event of the sale or lease of this property, the proprietors shall appear before a public meeting of the CDC. The CDC shall review the request and in its sole discretion, shall either; recommend that the Village Board approve of the transfer of the lease and / or ownership to the new proprietor without amendment to the Conditional Use Permit, or if the CDC deems that the new proprietor contemplates a change in use which is inconsistent with the Conditional Use Permit, the new proprietor shall be required to petition for a new public hearing before the CDC for a new Conditional Use Permit;
- 2. New building permits are required to deal with 5 outstanding permits and all future permits;
- 3. All work will have to meet current Code requirements;
- 4. The sidewalk must be completed on the Spruce Avenue frontage;
- 5. Monument sign must include 3 feet of landscaping around the base;
- 6. No liquor license;
- 7. No video gaming:
- 8. Site must be redesigned to eliminate the need for the stacking variation;
- 9. Building and column/canopy upgrades required.

Project Narrative 1301 W. Irving Park Road

INTRODUCTION

Lincolnwood Gas & Foods, Inc. ("LG&F") is requesting to reestablish their gas station at the corner of Irving Pk. Rd. and Spruce Ave.in Bensenville, including completion of the remodeling of the existing building, and includes rebranding the station to an Exxon station with Quick Mart.

Remodel of an approximately 1,500 square foot convenience store, eight car (8) parking stalls, six (6) multi-product fueling dispensers (this provides for twelve (10) automobile fueling positions)

This remodel will transform the underutilized repair station into a first class, updated fueling center. The Exxon Quick Mart, with both food and fueling components will serve the residents as well as a very active transient day time population.

The Quick Mart will give significant benefits to the immediate neighborhood as well as serving the west bound traffic on Irving park Rd. and that traffic exiting route 83 to Spruce Ave. In addition, this facility will create 2-4 new jobs in the community these will typically be people living within 5-7 blocks of the station.

The reestablishment and rejuvenation of the property will provide much needed amenities to the growing residential area and to more than 5,800 vehicles exiting Rout 83 on Spruce Ave. along with 18,800 daily vehicles on Irving Park Road.

The Quick Mart store will offer a variety of both replenishable & consumables from food to toiletry options, hot and cold beverages, and other convenience goods consisting of more than 900 items or SKU's.

MARKET OVERVIEW

LG&F targeted customers are (a) the residents with in one-mile radius, this group will visit the station on a regular basis 1-3 times a week as it will be the most convenient place to buy consumables. (b) residents within 1-2 mile radius this group in general will visit one time per month, and finally (c) the transient group is the day time traffic of 5,800 coming from Rout 83 off of Spruce Ave. past our store, and the west bound traffic on Irving Pk. Rd. 18,800 of this we will get a percentage of the traffic as our daytime customer.

According to the leading industrial real estate brokers in the O'Hare industrial office/warehouse submarket (bounded by I-294 on the east, I-290 on the south, I-355/Route 53 on the west, and Touhy Avenue on the north) has nearly 100,000,000 square feet of industrial flex space and represents the largest contiguous industrial park in the United States.

Despite the development of new fueling stations in the Bensenville area, the expansion of the industrial park and the extension of the Elgin-O'Hare expressway continues to drive consumer demand for a quick convenient "Quick Mart" Fueling Station for daily commuters as well as the increasing local population needed to keep it all working.

PROJECT OVERVIEW

Since the site is located along two of the busiest travel routes in the Bensenville, Elk Grove Village and Wood dale area, the Quick Mart will provide eight fast flow standard fueling lanes and two fast flow diesel lanes for cars and small trucks.

LG&F is also looking into setting up quick charge refueling for electric cars, we believe that this is the wave of the future for the daily local commuter and we would like to lead the way. Looking at the expanding market of electric cars and light truck we believe that it just a matter of time before they become main stream.

MARKET ANALYSIS

The reestablishment of this station along with the new and improved Quick Mart will serve the greater Bensenville O'Hare area for the next fifty years as it has for the past 60 years.

This location has long served as a combination auto repair/fueling station and most recently changed from auto repair to quick Mart fueling station given the many changes in both car technology and traffic demands this change was long overdue. It is because of our long history and willingness to expand and improve we humbly request that you approve our request for a special use permit to reestablish our business and continue our long history of serving the greater Bensenville area.

LG&F has projected sales of both Gas and convenient store sale see chart below. This at 1% sales tax would net +/- \$7,500.00 a year to the Village along with increased EAV with improved site. This is a win for everyone.

ZONING: C – 2 Highway Commercial District **REQUEST:** Conditional Use Permit, Service Station,

Municipal Code Section 10 - 7B - 3.

PUBLIC NOTICE:

- 1. A Legal Notice was published in the Bensenville Independent on Thursday July 19, 2018. A Certified copy of the Legal Notice is maintained in the CDC file and is available for viewing and inspection at the Community & Economic Development Department during regular business hours.
- 2. Village personnel posted a Notice of Public Hearing sign on the property, visible from the public way on Friday July 20, 2018.
- 3. On Friday July 20, 2018, Village personnel mailed from the Bensenville Post Office via First Class Mail a Notice of Public Hearing to taxpayers of record within 250' of the property in question. An Affidavit of Mailing executed by C & ED personnel and the list of recipients are maintained in the CDC file and are available for viewing and inspection at the Community & Economic Development department during regular business hours.

SUMMARY:

The Petitioner is applying for a Conditional Use Permit to operate a fueling station at the long vacant property at the northwest corner of Irving Park Road and Spruce Avenue. The station will be rebranded as an Exxon with Quick Mart. Although not part of the original request, it appears they will need a stacking variance, as they don't meet the required two vehicle stacking positions per fueling pump. They were also required to submit building plans, as much of that work had been done with a proper approval. The plans you see are mostly already completed. Also of note, the State fire marshal required the property owner to remove existing underground tanks. There are currently no tanks, but the owner says he has new tanks ready to install should the project move forward.

SURROUNDING LAND USES:

DEPARTMENT COMMENTS:							
SUPPORTS THE FOLLOWING APPLICABLE VILLAGE GOALS:							
Financially Sound Village Quality Customer Oriented Services Safe and Beautiful Village Enrich the lives of Residents Major Business/Corporate Center X Vibrant Major Corridors							
Finance: Account is paid up to date. Police:							
No police issues.							

Engineering and Public Works:

No comments.

Community & Economic Development:

Economic Development:

- 1) Supportive of this conditional use permit for a fueling station use.
- 2) The site is already built out as a gas station, and as such will require minimal construction or rehabilitation.
- 3) The fueling station will create a number of jobs for community residents, as well as generate sales tax for the Village.

Fire Safety:

No comments at this time.

Building:

- 1) The site has five issued permits, dating back to 2014, that have not been completed.
 - a. #4009 Interior demolition applied for 1/2014
 - b. #4313 Building alteration applied for 6/2014
 - c. #4842 Exterior improvements applied for 1/2015
 - d. #4928 Signage applied for 3/2015
 - e. #7884 Tank removal applied for 2/2018
- 2) New building permits would be required and since none of the old permitted work was finaled, all work will have to meet current code requirements.

3) An Office of the State Fire Marshal (OSFM) permit will be required for the installation of the new tanks.

Planning:

- 1) The 2015 Comprehensive Plan indicates "Local Commercial" for this property.
- 2) There was a prior gas station on the property. It closed in 2014.
- 3) Since this station closed, there have been 5 fueling stations approved by Village Board:
- 4) There are 13 fueling stations in the Village currently, with one more approved recently.

ADDRESS	BUS NAME

- 5) Applicant is proposing 10 auto-fueling positions: eight regular fuel and two diesel.
- 6) Applicant submitted a stacking exhibit, which doesn't show the required two stacking spots per fueling station. A variance for stacking requirements was not applied for.
- 7) The applicant is interested in installing electric vehicle charging stations.
- 8) From Village Code: The Village Board may require a traffic study to verify that the placement and spacing of curb cuts will not result in traffic conflicts with pedestrians and other motorists.
- 9) A full traffic study was not submitted.
- 10) Staff may want to close a curbcut.
- 11) The Spruce Avenue frontage does not have a sidewalk. Where the Site Plan has striping we should seek the removal of the pavement and have green space reintroduced to the Site.
- 12) The applicant submitted a project narrative with market overview.
 - a. They anticipate 960,000 gallons sold a year.
 - b. They anticipate the convenience store selling a total of \$744,000 a year.
- 13) The monument sign must include landscaping around the base.
- 14) The building and canopy are not built to the same standards as other recent approvals, including masonry on building and canopy columns.
- 15) Changes to the columns to include masonry and upgrades to the building should be considered.
- 16) Without the tanks in ground, is it possible to relocate/redesign pump islands to mitigate stacking variation?
- 17) Staff does not recommend a liquor license or video gaming to be allowed.

APPROVAL CRITERIA FOR CONDITIONAL USES:

The Community Development Commission shall not recommend approval of the Conditional Use Permit without determining that the request meets the following approval criteria and making certain findings of fact. The Applicant has provided the following Findings of Fact:

1. Traffic: The proposed use will not create any adverse impact of types or volumes of traffic flow not otherwise typical of permitted uses in the zoning district has been minimized.

Applicant's Response: The area shall not see or have any significant increase in traffic as the existing site function and use as a gas station is not changing.

2. Environmental Nuisance: The proposed use will not have negative effects of noise, glare, odor, dust, waste disposal, blockage of light or air or other adverse environmental effects of a type or degree not characteristic of the historic use of the property or permitted uses in the district.

Applicant's Response: The Conditional Use sought is for a Gas Station, the existing site is a Gas Station. The site shall not generate any greater noise than does exist, the building shall not add or reduce any light beyond what exists, the site shall not create any adverse environmental greater than is allowed.

3. Neighborhood Character: The proposed use will fit harmoniously with the existing character of existing permitted uses in its environs. Any adverse effects on environmental quality, property values or neighborhood character beyond those normally associated with permitted uses in the district have been minimized.

Applicant's Response: The proposed use of the property shall fit harmoniously with the existing character, and should have no adverse impact on environmental quality, property values, or neighborhood character as this site sites bordered by similar commercial uses and has been in existence since 1956.

4. Use of Public Services and Facilities: The proposed use will not require existing community facilities or services to a degree disproportionate to that normally expected of permitted uses in the district, nor generate disproportionate demand for new services or facilities in such a way as to place undue burdens upon existing development in the area.

Applicant's Response: The conditional Use Permit sought will not have a need for any greater, or a disproportionate demand on any village services or facilities than that of the surrounding area.

5. Public Necessity: The proposed use at the particular location requested is necessary to provide a service or a facility, which is in the interest of public convenience, and will contribute to the general welfare of the neighborhood or community.

Applicant's Response: The prosed use at this location (gas Station) has existed and provided a service to the community and has been a public convenience for over 60 years, we are just requesting to continue the existing use, for many more years. I would also like to say that this location has been not only a good neighbor, it has also been an income producer in the way of sales tax for those same years, and will continue to generate revenue for the village for years to come.

6. Other Factors: The use is in harmony with any other elements of compatibility pertinent in the judgment of the commission to the conditional use in its proposed location.

Applicant's Response: In closing let that conditional use permit we seek is to continue a use that has existed since 1956, that a track record of some 60 years. This site is surrounded by a Car Wash, Auto Parts, Auto Repair, Storage lots, Tavern, Hot Dog stand, and a retail Strip Center. I would contend that it fits in well with its neighbors.

Additional History/Comment from Applicant:

If it had not been for a couple unfortunate circumstances and miscommunications my client the Tenant/Lessee and initiator of the application for conditional use would not be before you today, this station has existed for over 60 years, so we ask you now to grant the petitioners the conditional use they request so they may complete the remodel of the station, continue its use, and once again be a productive Business in the Village of Bensenville.

Staff Response to Approval Criteria:

It is stated repeatetly, and incorrectly, that the exisiting use will remian. The site is curently vacant with no use. While a past use was a fueling station, it is not correct to say that the existing site function and use as a gas station is not changing. The site is not an existing gas station.

	Meets (Criteria
Conditional Use Approval Criteria	Yes	No
1. Traffic		X
2. Environmental Nuisance	X	
3. Neighborhood Character	X	
4. Public Services and Facilities	X	
5. Public Necessity		X
6. Other Factors	X	

RECOMMENDATIONS:

Staff recommends the Denial of the above Findings of Fact and therefore the Denial of the Conditional Use for Lincolnwood Gas & Food, Inc. If the CDC recommends approval staff suggests as a minimum the following conditions with the following conditions:

- 1. The Conditional Use Permit be granted solely to the Lincolnwood Gas & Food and shall be transferred only after a review by the Community Development Commission (CDC) and approval of the Village Board. In the event of the sale or lease of this property, the proprietors shall appear before a public meeting of the CDC. The CDC shall review the request and in its sole discretion, shall either; recommend that the Village Board approve of the transfer of the lease and / or ownership to the new proprietor without amendment to the Conditional Use Permit, or if the CDC deems that the new proprietor contemplates a change in use which is inconsistent with the Conditional Use Permit, the new proprietor shall be required to petition for a new public hearing before the CDC for a new Conditional Use Permit;
- 2. New building permits are required to deal with 5 outstanding permits and all future permits:
- 3. All work will have to meet current Code requirements;
- 4. The sidewalk must be completed on the Spruce Avenue frontage;

- 5. Monument sign must include 3 feet of landscaping around the base;
- 6. No liquor license;
- 7. No video gaming;
- 8. Site must be redesigned to eliminate the need for the stacking variation;
- 9. Building and column/canopy upgrades required.

Respectfully Submitted, Department of Community & Economic Development

GENERAL NOTES:

1. THESE DRAWINGS AND SPECIFICATIONS INCLUDING DESIGNS AND IDEAS REPRESENTED REPRESENTED
THEREON ARE AND SHALL REMAIN THE
PROPERTY OF THE ARCHITECT: AND NO
PART
THEREOF SHALL SE COPIED. DISCLOSED TO
OTHERS OR USED IN CONNECTION WITH

WORK OR PROJECT EXCEPT THOSE FOR

WHICH THAY HAVE BEEN DEVELOPED AND PREPARED WITHOUT THE WRITTEN CONSENT OF THE ARCHITECT. VISUAL CONTACT WITH THESE DRAWINGS AND SPECIFICATIONS SHALL CONSTITUTE CONCLUSIVE EVIDENCE OF ACCEPTANCE OF THESE RESTRICTIONS.

2. THE LATEST EDITION OF THE AMERICAN COODINONS OF THE CONTRACT FOR CONSTRUCTION* ARE HERESY MADE II PART OF THESE DRAWINGS AND SPECIFFICATIONS,

WELL AS THE CONTRACT FOR REFERENCE AND THEY SHALL LEGALY
ENFORCEABLE TO THE SAME DEGREE AND
EXTEND AS IF THEY WERE REPRODUCED
HEREON

3. GENERAL CONTRACTOR/CONSTRUCTION MANAGER AND EACH SUBCONTRACTOR

A. VISIT THE SITE, TO VERIFY ALL EXISTING CONDITIONS AND DIMENSIONS BEFORE COND TITIONS AND DIMENSIONS BEFORE SUBMITTING BIDS/PRICING AND REPORT TO THE ARCHITECTT ANY DISCREPANCIES OR CONDITIONS WHICH MAY INTERFERE WITH THE EXECUTION OF THE DEPICTED WORK. EXTRAS WILL NOT ALLOWED FOR

C, COMPLY WITH ALL RULES AN.O REGULATIONS OF THE OWNER AND/OR BULLDING MANAGEMENT REGARDING SITE ACCESS, DISPOSAL CONTAINER LOCATION, SECURITY, ELEVATOR USE, ETC. AND PAY ASSOCIATES FEES.

D. PROVIDE AII MATERIALS AND LABOR WHEATHER STATED OR IMPLIED TO COMPLETE
THE WORK AS DESCRIBED ON THESE

TO DAMAGE OR WEAKEN BUILDING SYSTEM

F, IMMEDIATELY REPAIR AII DAMAGE TO BUILDJNG SYSTEMS OR COMPONETS BEING MAINTAINED AT NO COST TO THE OWNER.

G. GUARANTEE ALL WORK FOR ONE (1) YEAR AFTER SUBSTANTIAL COMPLETION OF ALL

FINISH NOTES

1. ALL WALL AND CEILING MATERIALS SHALL BE NO LESS RESISTANT TO FLAME SPREAD THAN CLASS T~: FLAME SPREAD RATING OF 26 TO 75 AND SMOKE DEVELOPED 450.

2. PAINTING CONTRACTOR SHALL BE RESPONSIBLE FOR THE FINAL PREPARATION OF ALL SURFACES AS REQUIRED FOR APPLICATION OF NEW FINISHES, EXCLUDING

S. FLOOR COVERING CONTRACTOR SHALL BE RESPONSIBLE FOR THE FINAL PREPARATION OF ALL SURFACES AS REQUIRED FOR INSTALLATION OF NEW BASE AND FLOOR COVERING.

4. ALL WALL AND COLUMN SURFACES EXCEPT AS NOTED OTHERWISE SHALL BE PAINTED WITH A SUITABLE PRIMER AND TWO COATS FLAT LATEX PAINT. REFER TO FINISH SCHEDULE FOR EXACT COLOR(S).

5. ALL WALL AND COLUMN SURFACES SCHEDULED TO RECEIVE WALL COVERINGS SHALL FIRST BE PAINTED WITH ONE COAT OF AN APPROPRIATE PRIMER, ALL SURFACES SHALL BE DRY, CLEAN AND FREE OF BUMPS AND DEPRESSIONS PRIOR TO INSTALLATION.

6. ALL CLOSET SHELVING AND MISCELLANEOUS ITEMS AS DETERMINED SHALL BE PAINTED TO MATCH COLOR SELECTED FOR FINISH OF ADJACENT WALLS.

7. All WALLS AND COLUMNS SHALL RECEIVE 7. AIR VALLS AND COLUMNS SHALL RECEIVE BASEBOARD - SEE FINISH FLOOR PLANS FOR FURTHER SPECIFICATION, VINYL BASE SHALL BE STRAIGHT IN AREAS TO BE CARPETED AND COVED IN AREAS TO BE TILED.

8. CARPET CONTRACTOR SHALL INSTALL CARPET AS INDICATED ON THE CONSTRUCTION PLAN.
DIRECT GLUE DOWN INSTALLATION SHALL BE
USED UNLESS NOTED OTHERWISE. REFER TO
FINISH SCHEDULE FOR EXACT SPECIFICATION.

OF EMPIRION.

9. VINYL COMPOSITE TILE (VCT) SHALL BE INSTALLED AS INDICATED ON THE CONSTRUCTION PLAN. CONSTRUCTION MANAGER TO CONTACT OWNER FOLLOWING INSTALLATION SO ARRANGEMENTS CAN BE MADE TO SEAL AND WAXIT. APPROPRIATE TRANSITION STRIPS SHALL BE INSTALLED AT CHANGE OF FLOOR FINISH LOCATIONS. REFER TO FINISH SCHEDULE FOR EXACT SPECIFICATIONS. SPECIFICATIONS

MILLWORK NOTES:

1. ALL MILLWORK SHALL COMPLY WITH THE APPROPRIATE SPECIFICATIONS OF THE "ARCHITECTURAL QUALITY STANDARDS ILLUSTRATED" OF THE ARCH ITECTURAL WOODWORK INSTITUTE (AWI) FOR "CUSTOM" GRADE MILLWORK.

2. MILLWORK CONTRACTOR SHALL VERIFY ALL DIMENSIONS AFFECTING HIS WORK IN THE FIELD PRIOR TO FABRICATION.

3. MILLWORK CONTRACTOR SHALL FURNISH AND INSTALL ALL INDICATED CABINETRY. COUNTERTOPS, HARDWARE AND REQUIRED IN WALL BLOCKING WHERE REQUIRED.

4. ALL WOOD BLOCKING AND FRAMING SHALL BE FIRE RETARDANT TREATED.

5. ALL COUNTER AND VANITY TOPS SHALL BE 3/4" THICK WITH 1-1/2" THICK FASCIA, HIGH DENSITY PARTICLE BOARD SHIMMED AND SECURED TO UNDERCOUNTER CABINETRY AND/OR CLEATED TO WALLS AND SEALED TO SAME WITH CLEAR SILICON CAULK.

6. ALL CABINETRY SHALL HAVE 3/4" THICK FLUSH OVERHANG TYPE DOORS.

7. CABINET WALLS AND ALL FACE, FILLER AND BACKUP PANELS SHALL BE 3/4" THICK.

8 CARINET HARDWARE SHALL INCLUDE 8. CABINET HARDWARE SHALL INCLUDE SLIDES, ACCURIDE FULL EXTENSION DRAWER SUDES, STANLEY SELF CLOSING CONCEALED DOOR HINGES. AND STANLEY WE SHE WITH FINISH TO MATCH THAT OF THE DOOR HARDWARE FOLLOWING INSTALLATION, ALL DOORS SHALL BE PROPERENT ADJUSTED AND ALL HARDWARE CHECKED FOR PROPER OPERATION.

9. ALL CABINET SHELVES SHALL BE ADJUSTABLE ON RECESSED PILASTER STANDARDS AND CLIPS.

10. CLOSET SHELVES SHALL BE 3/4" THICK HIGH DENSITY PAINT GRADE PARTICLE BOARD WITH A 1/4" HARDWOOD EDGE HUNG ON CO-TINUOUS WALL CLEATS AND PAINTED TO HATCH ADJACENT WALL SURFAGE.

REFLECTED CEILING NOTES:

 MECHANICAL AND ELECTRICAL CONTRACTORS
 SHALL VERIFY CONDITIONS IN THE FIELD
 AND NOTIFY THE ARCHITECT OF ANY
 DISCREPANCIES FROM WHAT IS REPRESENTED.

2. MECHANICAL CONTRACTOR SHALL LOCATE

AND SIZE ALL OUTLETS AND RETURNS. DETERMINE DUCT-PIK LAYOUT. THERMOSTAT LOCATIONS AND OTHERMOS DESIGN THE HVAC SYSTEM AND PREPARE ANY REOURED DOCUMENTS. THE ENTIRE HVAC SYSTEM SHALL CONFORM TO ALL APPLICABLE CODES.

3. ACQUISTICAL CEILING SHALL BE BUILDING 3. ACOUSTICAL CELLING SHALL BE BUILDING STANDARD AMSTRONG OR EQUAL 2' x 4' LAYIN CEILING TILE WITH STANDARD EXPOSED GRID SUSPENSION SYSTEM. TILES SHALL BE KERFED AT ALL INTERIOR PARTITION AS DETAILED.

4. LIGHT FIXTURES SHALL BE AS SPECIFIED ON THE LIGHT FIXTURE SCHEDULE. REFER TO REFLECTED CEILING PLAN FOR TYPE OF MOUNTING (I.E. DRYWALL CEILING, LAYIN, ETC.).

5. EXIT SIGNS SHALL BE LOCATED AS SHOWN ON EMERGENCY EXIT PLAN - SEE SCHEDULE FOR EXACT SPECIFICATIONS.

6. ALL EXIT SIGNS, DOWNLIGHTS, SPEAKERS. ETC. LOCATED IN THE CEILING SHALL BE INSTALLED IN THE CENTER OF THE CEILING TILE INDICATED UNLESS DIMENSIONED

7. ALL SUPPLY OR EXHAUST DIFFUSERS SHOWN ON THE REFLECTED CEILING PLAN ARE FOR LOCATION ONLY. MECHANICAL CONTRACTOR SHALL MAKE FINAL DETERMINATIONS.

8. ALL SWITCHES SHALL BE MOUNTED VERTICALLY AT THE BUILDING STANDARD

POWER AND TELEPHONE NOTES:

ELECTRICAL CONTRACTOR SHALL VERIFY CONDITIONS AND NOTIFY THE ARCHITECT OF ANY DISCREPANCIES FROM WHAT IS INDICATED.

2. ALL ELECTRICAL WORK SHALL COMPLY WITH ALL APPLICABLE CODES.

3. DIMENSIONS LOCATING OUTLETS ARE TO

CENTERLINES OF THE DEVICES.

4. WHERE FLOOR OUTLETS ARE GRAPHICALLY SHOWN ADJACENT TO A WALL, THEY SHALL BE WITHIN SIX INCHES OF THE WALL.

5. All FLOOR OUTLETS SHALL BE PIPED THROUGH THE CEILING OF THE SPACE BELOW TO THE DETERMINED LOCATION UNLESS CHANNELING OF THE FLOOR IS DETERMINED TO BE A BETTER AND LESS EXPENSIVE ON, ELECTRICAL CONTRACTOR TO OPTION, ELECTRICAL CONTRACTOR TO INCLUDE IN HIS PRICE WHATEVER CHANNELING OR SCAFFOLDING IS NECESSARY TO DO THE WORK.

6. ALL WALL OUTLETS SHALL BE MOUNTED HORIZONTALLY TWELVE INCHES ABOVE THE FINISHED FLOOR UNLESS OTHERWISE NOTED.

A CONDUIT STUB (SIZE TO BE DETERMINED) FROM THE CEILING AT THE LOCATION OF THE TELEPHONE PANEL.

8. ALL REQUIREMENTS FOR SPECIAL POYER AND/OR DEVICES AS INDICATED IN DRAWINGS OR OTHERWISE NOTED SHALL BE VERIFIED BY THE ELECTRICAL CONTRACTOR PRIOR TO SUBMITTING PRICE.

9. ALL WALL ELECTRICAL AND TELEPHONE OUTLET COVERPLATES SHALL BE LEVITON OR EQUAL, WITH WHITE FINISH.

Revision Schedule Revision Number Date Issued by

The above drawings and specifications, and ideas, Design and arrangements represented thereby as an exhalter ment the property of the Architect and no part three of shall be copied, decleded to others or used in the connection with any work to project other three three project of the train the specification opposited twin they have been paragraded and developed without the written consent of the Architect. Vistal contract with these developed without the written consent of the Architect. Without contract with these developed shall have pre-ordering constitution confluxive evidence of acceptance of these residencies and eventual three pre-orderings on the pass and sharp with three pre-orderings on the state of sand this other manual formations of any contractions and confidence of the pass and this other manual beautified of any variations from the dimensions and confidence shown by these drawings.
